

Education

Location	University	Sept 2021 – Jul 2024
- BSc in Computer Science. Upper Second Class Honours (2:1). Relevant Modules: Web Development, Data Structures and Algorithms, Object Oriented Programming.		

Experience

Certus Technology

Software Developer | In Person | Mar 2025 -

- Lead front-end development of a workforce management platform for pathology laboratories across the NHS, using **Next.js**, **React**, **Typescript** and the **T3** stack.
- Developed and integrated **GraphQL** APIs with a **Spring Boot** back-end, using **Apollo Client** on the front-end.
- Applied modern React principles across a large production application, including **component composition** and **state management**.
- Maintained and extended a fork of **H5P**, working with its legacy **jQuery/JavaScript** codebase to integrate with the platform.

Online Content Quality Evaluator

Independent Contractor | Remote | Mar 2022 - Jan 2025

- Engage with a remote team, under the direction of a project manager, on various AI/ML, social media, and search engine analysis projects.
- Work remotely and independently to support the measurement of search data relevance.
- Evaluate the quality of online content according to detailed criteria to determine its appropriateness with community guidelines and Terms of Service (ToS) across social media platforms.

Projects

Guided Reader

<https://reader.scarlettparker.co.uk>

- Designed and developed a full-stack web application with **React**, **Vite** and **Spring Boot** to support a community of over **6,000** language learners, offering interactive guided reading tools.
- Dictionary lookup via **WordReference** and **Forvo** audio, implemented **OAuth2** through various providers.
- Fully tested with **Cypress** for integration testing, unit testing with **Vitest**, and running live, deployed behind **Nginx** and managed using **PM2**.

Learner

<https://github.com/scarlettmparker/Learner>

- Built a CLI that turns topics into scored quizzes, pulling data from internal notes and **Wikimedia APIs**.
- Generates multiple-choice, fill-in-the-blank and short-answer questions and saves each run with researched material, answers and gaps.
- Stores results for spaced repetition and **Anki** deck generation.

Accessibility Tools

<https://github.com/scarlettimparker/Accessibility-Tools>

- Browser extension designed to improve web accessibility, built with the WXT framework (supports **React** libraries and **TypeScript**).
- Trained a highly accurate Image Classifier on the ImageNet dataset using **PyTorch**, which can be ran locally on a **Python** web server built with **Django**.
- Addressed web accessibility issues as per the **WCAG**, allowing those with impairments to more easily navigate the web.

Skills

Languages: English (native), Greek (working knowledge).

Programming Languages: HTML, CSS (& Tailwind), TypeScript, C++.

Frameworks/Tools: React, SolidJS, PostgreSQL, Jest.
